Solutions Engineer & Technical Sales Professional

Technical sales professional with 7+ years driving \$7M+ in revenue through pre-sales engineering, POC delivery, and enterprise solution design. **94% POC conversion rate** at Oracle with \$6.3M direct revenue contribution. Deep expertise in cloud infrastructure, data pipelines, observability, and translating complex technical architectures into business value. Proven ability to demo products, lead technical workshops, and enable Fortune 500 customers. Experienced remote worker with strong documentation and technical storytelling skills.

Experience

Oracle Corporation, Reston, VA

Cloud Solutions Engineer | July 2018 – September 2019

Led technical solution design and customer engagement for Oracle Cloud Infrastructure, focusing on enterprise migration, data architecture, and modernization initiatives.

- **Achieved 94% proof-of-concept conversion rate** through compelling technical demonstrations and customer-specific solution architectures
 - Contributed to **\$6.3M in Oracle Cloud Infrastructure revenue** through strategic solution design and technical pre-sales leadership
 - Architected 20+ enterprise cloud solutions achieving average 32% TCO reduction and 99.9% uptime for production workloads
 - Led technical workshops and product demos for Fortune 500 clients, translating complex technical concepts for diverse stakeholder groups
 - Developed Infrastructure as Code automation reducing deployment time from weeks to hours using Terraform and cloud-native tools
 - Documented solution architectures and best practices for customer enablement and internal knowledge sharing
-

Amazon Web Services, Arlington, VA

Technical Curriculum Architect | March 2024 – Present

Lead development of AWS Cloud Engineering and AI training programs, collaborating with sales, product, and customer success teams to drive service adoption and customer outcomes.

- Architected technical training programs for 50+ AWS services including **CloudWatch, logging pipelines, and monitoring solutions**, reaching 5,000+ learners annually
- Generated **\$2M+ in training and sales enablement revenue** through hands-on labs, tutorials, and customer success initiatives
- Partnered with product, sales, and marketing teams to align technical content with business

- objectives, contributing to 15% increase in AWS service adoption among enterprise clients
 - Authored 100+ hands-on labs and technical documentation, increasing hands-on learning engagement by 30%
 - Designed live hackathons and technical events, directly contributing to customer success outcomes
-

Chegg Inc., San Diego, CA (Remote)

Senior Full Stack Development Instructor | September 2022 – February 2024

Led enterprise-grade technical training in a fully remote environment, focusing on cloud-native development and building internal tools to drive customer retention and success.

- Maintained **95%+ class retention and graduation rates** through engaging technical instruction and proactive customer support
 - Built automated progress tracking and analytics systems improving customer retention by 20%
 - Designed Python-based automation tools reducing instructor workload by 40% and review time by 70%
 - Conducted 500+ technical mentoring sessions covering cloud architecture, development practices, and solution design
 - Led 15+ community technical events contributing to 20% increase in customer enrollment
-

Groundswell (formerly Collabralink Technologies), McLean, VA

Software Developer | February 2018 – July 2018

Developed secure applications for government clients with focus on data security, process automation, and system reliability.

- Built secure government applications using Appian BPM and SQL Server, maintaining **Public Trust clearance** and federal security protocols
 - Developed business process automation tools reducing manual processing time by 50% for federal agency workflows
 - Implemented database performance improvements and monitoring systems ensuring 99.9% system availability
-

Coding Dojo, Arlington, VA

Lead Full Stack Development Instructor | September 2019 – September 2022

Managed technical education programs training 500+ developers, generating \$180K revenue through scalable education delivery. Led team of 15+ instructors establishing standardized methodologies and quality assurance processes.
